NATURAL GREEN
SEEDS

WHERE KIDS ARE A PART OF NATURE

The box sets named Seeds of Adventure contain a variety of organic seeds, games, activities and fun facts about nature.

With the help of three lovely characters, Pip, Lilly, & Oliver, the kids get to grow and nurture their own vegetables, flowers, and herbs. While doing this, they use their creativity, knowledge and spend some quality time playing.

These days kids spend most of their time indoors, in front of screens and electronics. Seeds of Adventure takes your kid back to nature.

Your kids will learn how the sun, fresh air, water and soil are all essential parts of our circle of life.

Growing your own garden takes work and patience. Seeds of Adventure helps your kids learn these skills while having a good time.

NATURAL GREEN ADVENTURE

It all began when Lilly, Oliver and Pip found a jar full of dormant seeds and an old map. The three brave friends discover a magical secret garden with only the clues they had...

It wasn't easy but thanks to wisdom, curiosity and a little bit of luck they found the secret garden and made it magical again.

Now, they want to spread the joy and beauty to all forgotten gardens that are waiting for a kid like you.
